EDUCATION

Boston University Computing & Data Science, Boston, MA Sep 2024 – May 2026
Master's in Data Science (GPA: 4.0) | Academic Excellence Award (1 of 2 recipients, Spring 2026 graduating class)

Boston University Questrom School of Business, Boston, MA Sep 2012 – Sep 2018
Bachelor of Science Business Administration – Accounting

WORK EXPERIENCE

Concentrix Catalyst Korea ACT, Seoul, Republic of Korea Oct 2020 – Jul 2023
Web Data Analyst (Samsung Electronics HQ)

Customer Service Team

- Led a 3-person team that lifted self-service resolution rate (HCR) from 60% to 85%, beating the 82% target
- Found outdated solutions dragging HCR via content update history; proposed cleanup drove a ~12pp gain
- Proposed UK A/B test routing hardware-failure articles to repair service; their HCR rose from ~20% to ~80%
- Designed KPI dashboard via Adobe Analytics API (journey funnel, time on page) for 89 global subsidiaries

Mobile Promotions Team

- Analyzed site funnels (landing → PDP → cart → order) for 3 Galaxy launch & BFCM promos in 14 countries
- Went beyond required reports to analyze button-level CTR/conversion and mobile vs. desktop layouts
- Recommended device-specific button & banner fixes; once adopted, site conversion rose 1.8pp (pre/post)

Display & Signage Team

- Built Python ETL (Adobe Analytics API, MySQL, pandas) to automate a 15-market monthly KPI report
- Cut reporting from 2 analysts × 3 days to a 2-hour automated run, freeing the team for deeper analysis
- Turned it into a no-code app lifting Adobe Analytics depth/row limits; adopted by 2 teams for key reports
- Moved high-CTR buttons above the fold, as most users never scrolled; promo-page CTR rose ~42% → 65%

ACADEMIC PROJECTS

Rivalry-Based Messaging Experiment (Causal Inference) Jan 2026 – Mar 2026

- Co-designed a randomized Qualtrics experiment (n=65) testing rivalry vs. team-pride donation appeals
- Estimated ATE via t-tests and OLS with balance checks; explored effects by fandom and hometown

Amazon Customer Review Analysis (NLP, PySpark) Sep 2025 – Dec 2025

- Proposed the project and led NLP: PySpark LDA on 17M+ 1–2 star reviews surfaced 6 complaint themes
- Joined 100M+ reviews to 5M+ products in PySpark; listings with top-voted critiques rated 2.7 vs. 4.0+ stars

Epidemic Engine (Real-Time Data Pipeline & Alerting) Sep 2025 – Dec 2025

- Co-built a Kafka → NiFi → Spark streaming pipeline; owned the TimescaleDB analytics store on OpenShift
- Built Slack alerting with z-scores vs. a 7-day baseline, 3 severity tiers and 60-min per-region cooldowns

Student Debt Litigation Analysis for GBH News (BU Spark!) Sep 2024 – Dec 2024

- Wrote MySQL joins on court records to find 3,300+ MEFA lawsuits since 2015, a key figure in GBH News
- Profiled 9 student-loan collectors (15K+ cases); fixed an encoding bug that hid ~half of licensed collectors

Boston Bluebikes Analysis (Azure Data Pipeline) Sep 2024 – Dec 2024

- Built Azure Medallion pipeline (Data Factory, Databricks, Event Hub) merging 12M+ trips, events & crashes
- Built Power BI dashboards on Azure SQL flagging downtown station imbalance and event-driven demand

SKILLS

Programming: Python (pandas, NumPy, scikit-learn, PySpark), SQL (MySQL, PostgreSQL/TimescaleDB), Git

Big Data & Cloud: Spark, Kafka, NiFi, Azure (Data Factory, Databricks, Event Hub, Synapse, ML), GCP, OpenShift

Analytics & ML: A/B testing, funnel analysis, causal inference (ATE, OLS), LightGBM, clustering (GMM), NLP (LDA)

Web Analytics & BI: Adobe Analytics (incl. API), Google Analytics, Power BI, Excel, Jupyter

Languages: Korean (native), English (fluent)
